

## DIRECTORY OF DOD ENGINEERING DATA REPOSITORIES

The office symbols, addresses, telephone and e-mail numbers contained herein are current as of 12 April 2012. Due to frequent organizational changes of structure, designation, and locations, the information contained herein may change at any time. Each organization listed is urged to notify [medals@dla.mil](mailto:medals@dla.mil) with updates as those changes occur.

---

---

### SCOPE

The purpose of this listing is to identify the engineering data repository sites within each service. It is a consolidated reference source to aid in the search of, and subsequently to obtain, engineering data maintained in DoD repositories. It is not intended for use with engineering data purchase requests, or to supersede any Department of Defense Index of Specifications and Standards (DODISS) requirement and there are no Data Item Description (DIDs) associated with this listing.

---

---

### CONTROLS

It is the responsibility of all personnel that use engineering data to adhere to appropriate handling, storage, distribution, and disposal controls. Data marked with restrictive legends must be safeguarded against release or access to unauthorized personnel (Government and non-Government).

---

---

### EXPLANATION OF TERMS

**Engineering data.** Engineering documents (i.e., drawings associated lists, accompanying documents, manufacture specifications and standards), or other information prepared by a design activity relating to the design, manufacture, procurement, test, or inspection of items or services.

**Primary repository.** Repositories that receive, inspect, accept and store the official record copy of data, and disseminate copies of that data to established customers and other appropriate requesters or users.

#### Acronyms.

AFMC	-	Air Force Materiel Command
ALC	-	Air Logistics Center
DDN	-	Defense Data Network
DLA	-	Defense Logistics Agency
DID	-	Data Item Description
DLANET	-	Defense Logistics Agency Network
DoD	-	Department of Defense
DOE	-	Department of Energy
DODISS	-	Department of Defense Index of Specifications and Standards
DSN	-	Defense Switching Network
DTRA	-	Defense Threat Reduction Agency
FSC	-	Federal Supply Class
JEDMICS	-	Joint Engineering Data Management Information and Control System

MEDALS	-	Military Engineering Data Asset Locator System
NWD	-	Nuclear Weapons Directorate
PDM	-	Product Data Management

---

---

## GENERAL INFORMATION

---

---

**DoD primary repository concept.** Within the DoD, official record copies of engineering data are stored within primary repositories. The concept of each service's primary repositories is as follows.

### DoD SERVICE REPOSITORIES

**Air Force:** Within the Air Force, primary repositories operate under a decentralized concept. The decentralized repository functions are located within the Air Force Materiel Command (AFMC); specifically, at the three Air Logistics Centers (ALC). As appropriate, each repository maintains specific categories of data. Categories are identified in the D086 Mission Workload Assignments System.

**Army:** Within the Army, primary repositories operate under a decentralized concept. The decentralized repository functions are located throughout the various commands. As appropriate, each repository maintains specific categories of data. The assignments are related to a maintenance or acquisition need of various types of data (explosives, vehicular equipment, etc.). See TYPE OF DATA MAINTAINED for groupings of data categories linked to the appropriate Army repository.

**Navy:** Within the Navy, primary repositories operate under a decentralized concept. The decentralized repository functions are located throughout the various commands. As appropriate, each repository maintains specific categories of data. The assignments are related to a maintenance or acquisition need of various types of data (ships, weapon systems, machinery, etc.). See TYPE OF DATA MAINTAINED for groupings of data categories linked to the appropriate Navy repository.

**Marine Corps:** The Marine Corps has a primary repository that operates under a centralized concept. The centralized repository function is located within the Marine Corps Research, Development and Acquisition Command; specifically, the Marine Corps Logistics Base. This repository maintains all categories of data applicable to the Marine Corps.

**Defense Logistics Agency (DLA):** Within the DLA, primary repositories operate under a centralized concept. The decentralized repository functions are located throughout the various centers. As appropriate, each repository maintains specific categories of data. The assignments are related to the Federal Supply Class (FSC) of the products depicted by the data. DoD Manual 4100.39-M, Chapter 1, Volume 1, identifies the assignments.

**U. S. Coast Guard:** Within the Coast Guard, primary repositories operate under a decentralized concept. The decentralized repositories functions are located at the Engineering Logistics Center (ELC) and Aircraft Repair and Supply Center (ARSC). Each center maintains a repository of a specific category of data applicable to the Coast Guard.

## SPECIAL REPOSITORIES

**DOE nuclear data repository.** Nuclear data is controlled within the Department of Energy (DOE). DOE engineering data are subject to limited rights use and may not be used for acquisition of materiel, for information purposes external of the DOD, or for contractor operational or manufacturing processes, unless specific authorization has been granted by the DOE. Official record copies of nuclear engineering data are stored within a primary repository that operates under a centralized concept. The centralized repository function is located within the Defense Threat Reduction Agency (DTRA), Combat Support Nuclear Stockpile Logistics Branch Library (CSNLCC), Kirtland Air Force Base, New Mexico 87117-5669.

**DoD nuclear data repositories.** Within the DoD, nuclear data is controlled and stored within two special repositories that operate under a centralized concept; specifically, the Air Force Nuclear Weapons Directorate (NWD), at Kirtland Air Force Base, New Mexico and the Navy at the United States Naval Inventory Control Point, Mechanicsburg, Pennsylvania. As appropriate, each repository is assigned service unique types of nuclear data.

**Cryptologic data repository.** Within the Air Force, service unique cryptological data are controlled and stored in a repository that operates under a centralized concept. The centralized repository function is located within the Air Force Security Command, Lackland Air Force Base, Texas.

**Atomic energy detection system data repository.** Within the Air Force, service unique atomic energy detection system data are controlled by a USAF Field Operating Agency (AFTAC/LSC, is located at Patrick Air Force Base, Florida). The data are stored in a repository that operates under a centralized concept.

**Military Engineering Data Asset Locator System (MEDALS).** MEDALS is the DoD central engineering data indexing authority and is associated with the primary Service repositories using the Joint Engineering Data Management Information and Control Systems (JEDMICS) and a variety of Product Data Management (PDM) systems for file storage. The MEDALS program is accessed through the World Wide Web via a Secure Socket Layer (SSL) at <https://www.logisticsinformationservice.dla.mil/medals>. DOD technical data repositories, which store, maintain, and distribute the engineering drawings, supply the MEDALS program with technical drawing indexing data and associated information. The MEDALS program in turn supplies this information to its customers along with the drawing location(s). Engineering data is indexed in the MEDALS database per each Service's control procedures utilizing combinations of Document Numbers, Part Numbers, NSN/NIINs, and Titles. MEDALS index data provides the repository location of the document listed, point of contact, and associated data.

---

## DETAILED INFORMATION

---

**Ordering.** Data should be ordered from the repositories listed herein. When ordering data, requesters not within DLA, should order the data from the appropriate Air Force, Army, Navy, Marine Corps, or U. S. Coast Guard repository.

**Directory information.** The following provides information for contacting individual DoD Engineering Data Repositories. Due to the fluid nature of this information, it is only as current as provided by each repository site. E-mail contact information is provided for those repositories having established a non-personal, group address.
